?: Kde jsou pěstá-rny masožravých rostlin?

A:

Dedicated carnivorous plant nurseries are the best places to buy carnivorous plants, especially for the beginner or beginning-intermediate grower that is not too picky about looking for impossible-to-find species. Purchases can also be made via eBay, although I suggest you be cautious in such purchases.

The web sites listed below are for carnivorous plant nurseries. I am a stickler for making sure that nurseries I deal with are not involved in field collection. So in order for any online nursery to be listed on this FAQ, they must agree with the following disclaimer:

"The material I sell is propagated by me or suppliers who develop stock by tissue culture. Any field collection I do is legal, and is to develop breeding or propagation stock only. I do not sell plants or seeds that have been collected by me or my contacts to fill plant orders."

The nurseries on this page agreed with the above conservation statement. I applaud their conservation ethic and encourage you to do business with them. They are listed in alphabetical order by nursery name. When seeking plants, do not forget the benefits of joining The International Carnivorous Plant Society or the various other carnivorous plant societies. Most of these societies have seedbanks or trading parties.

For clarification, I do not patrol the web, looking for nurseries to include on this listing. If you run a nursery and agree with the conservation statement on this page, send me your data using the same format that I have below, and I will include you. It may take a few weeks for me to upload your data, so please be patient. If you have a listing, but your nursery information changes, it is your responsibility to supply updated information to me. If I encounter a nursery with a broken link I will remove it from the list. I despise dead links, and do not have time to track you down. If you notice your nursery has been removed, just contact me with the new information and I will reinstate you!

While presented in association with the International Carnivorous Plant Society, this FAQ is maintained by me (Barry Rice). As such, I do not have to be entirely impartial. Indeed, my favorite nursery listed on this page is California Carnivores, run by Peter D'Amato--master horticulturist and acclaimed author. If you are in the USA and are looking for plants, I encourage you to start there. Peter has been a longtime supporter of the ICPS. You can buy from him in safety.

Best Carnivorous Plants (Czech Republic)

E-mail: [cp\(at\)bestcarnivorousplants.com](mailto:cp(at)bestcarnivorousplants.com)

WWW: <http://www.bestcarnivorousplants.com>

Plant sales only in USA. Specially bred *Sarracenia*

seed.

My Carnivore/Brian Hanrahan (USA)

E-mail: [brian\(at\)mycarnivore.com](mailto:brian(at)mycarnivore.com)

WWW: <http://www.mycarnivore.com>

Comments: Venus flytrap, sundew, and pitcher plant pets in terrariums with great web support.

(Note from FAQ-master Barry: normally I do not editorialize on these entries, but I can't resist in this case. Obviously, the plants at "My Carnivore" are overpriced, at about \$20 for a single Venus flytrap. But Brian is apparently not just selling a plant, he is selling funny packaging as well. The packing includes a name, birthday, etc. You can buy accessories for your plant, like skeletons and so on. If you just want an inexpensive plant, "My Carnivore" is not for you. But if you want a goofy, funny, conversation piece, surf no further than Brian's web site.)

The Nepenthes Nursery/Andreas Wistuba (Germany)

E-mail: [andreas\(at\)wistuba.com](mailto:andreas(at)wistuba.com)

WWW: <http://www.wistuba.com>

Comments: Nepenthes, Heliamphora, Pinguicula, Cephalotus worldwide except Australia and New Zealand.

Sarracenia Northwest Carnivorous Plants (USA)

E-mail: [jeff\(at\)cobraplant.com](mailto:jeff(at)cobraplant.com)

WWW: <http://www.cobraplant.com>

Comments: We promote the growing of Sarracenia species and Venus flytraps outdoors. We also provide a free monthly reminder on how to care for your plants all year round.

Southern Carnivores (Australia)

E-mail: [phillmann\(at\)scarnivores.com](mailto:phillmann(at)scarnivores.com)

WWW: <http://www.scarnivores.com>

Comments: Nepenthes, Cephalotus, Drosera. Plants grown from seed and tissue culture. Specializing in Nepenthes and Nepenthes hybrids.

Triffid Nurseries (UK)

E-mail: [andy\(at\)triffidnurseries.co.uk](mailto:andy(at)triffidnurseries.co.uk)

WWW: <http://www.triffidnurseries.co.uk/>

Comments: Nepenthes, Sarracenia, Drosera, VFTs, Pings, Utrics, Heliamphora and Cephalotus. Plants shipped throughout Europe. Extensive CP Seed List shipped worldwide.

Triffid Park (Australia)
